

Nearly 1 in 5 new drivers get into a crash soon after getting their driver's license.

Good news!

Your driver training program now includes a state-of-the-art tool to help improve your skills for avoiding crashes.

The Ohio Traffic Safety Office provides this tool to select driving schools, including yours, to test this service. Your instructor includes this as part of one of your driving lessons.

Ready-Assess™ is a 15-minute virtual drive that was developed to safely measure new driver skills important for avoiding common serious crash scenarios. You receive your Personalized Feedback Report within one day by email.

Your Personalized Feedback Report includes:

- Detailed feedback on how well you handled common crash scenarios
- Suggestions of specific skills that you can improve on to better avoid crashes
- Access to free learning videos selected specifically for you

Your input is important!

The Ohio Traffic Safety Office has partnered with the Children's Hospital of Philadelphia to ask you a few questions about your experience so we can learn how to improve this new service.

In 2-3 days after you take Ready-Assess™ you will receive an email from Children's Hospital of Philadelphia inviting you to complete a short online survey about your experience.
